

## Midwestern Regional Meeting Abstracts Subject Index

## A

- Abdominal aortic aneurysm (AAA), effect of CD14 gene deletion on, 48
- Acetaldehyde (AcH), role of aromatic amines on anti-coagulant effects upon APTT, 52
- Acute ischemic stroke, therapeutic efficacy of tissue plasminogen activator (tPA) in treating, 98
- Acute kidney injury (AKI), diagnostic and prognostic evaluation following adult cardiac surgery, 106
- Acute lung injury  
anti-inflammatory role of integrin  $\beta 4$  in, 128
- Acute lung injury, role of pre-B-cell colony-enhancing factor (PBEF) in, 94
- Alcohol, role of genetic variation in mediating effects of, 56
- Aldosterone, role in stimulating NCC function and protein expression, 41, 44
- 16 alpha-hydroxyestrone, serum, demographic and behavioral predictors of, 39
- Amifostine, impact of delayed cytoprotection effects on, 35
- AMP activated protein kinase (AMPK)  
inhibitory effect of ethanol on phosphorylation of, 83  
role of peroxisome proliferator-activated receptor activity on, 76  
study of role of PKC  $\xi$  and CaMKK in TGF- $\beta$  activated kinase 1 signaling in activation of, 75
- Anthrax vaccine (AVA), genetic variations associated with anti-Protective Antigen antibody responses of, 85
- Apocynin (APO), effects in diseased human left ventricular endocardium, 121
- Asbestos, role in alveolar epithelial cell (AEC) injury, 50
- Aseptic meningitis syndrome, risk classification in adults, 105
- Asthma, study of association of sphingosine-1-phosphate (S1P) with, 66
- Atherosclerosis  
role for Tie1 signaling in, 70  
role of F11 receptor/junctional adhesion molecule-A (F11R/JAM-A) in, 69  
role of S100A12 vascular smooth muscle cells (VSMC) in, and plaque calcification, 92
- Athletes, role of chronic exercise in favorable alterations of vascular functions in, 133
- Atorvastatin, effect on lipids in ApoE mouse model, 31
- Autotaxin (ATX), role in lung alveolar cell line (A549) migration and wound repair, 101

## B

- Bacillus anthracis*, evaluation of, in spore uptake and distribution in resident immune cells in a human lung organ culture model of inhalational anthrax, 120
- Bcl-xL, role in anti-apoptotic activity, 74
- Blood pressure (BP) regulation, role of genomic variants in, 130
- Bloodstream infection (BSI), reliability of historical, physical examination and

laboratory information in the diagnosis of, 125

- Bronchus associated lymphoid tissue (BALT), study of correlation with the severity of lung disease through the cooperation of autoreactive T and B cells, 86

## C

- Caloric restriction combined with partial sleep loss, effects on glucose regulation in overweight adults, 24
- Cardiac KATP channels, impact of dynamic regulation of, in cardiac adaptation to physical activity and myocyte energy consumption, 126
- Cardiopulmonary bypass (CPB) surgery, analysis of incidence of thrombocytopenia and HIT in patients undergoing, 123
- CATCH-IT, evaluation of Internet-based depression prevention intervention for adolescents ages 14–21, 34
- $\beta$ -catenin  
characterization of paxillin interaction with, 96  
role in fibrogenic activities, 77
- CD4+CD25hiFOXP3+ regulatory cells, role as a biomarker for acute graft-versus-host disease, 116
- Cdk1/cyclin B signaling, role of Bcl-xL as a key target of pro-apoptotic, 74
- Central retinal artery occlusion (CRAO), and with non-arteritic ischemic optic neuropathy (NAION) vs central retinal vein (CRVO), study of familial hypofibrinolysis, 12
- C-FLIP, role in multiple myeloma, 89
- Child Mania Rating Scale (CMRS), validity rating of, 8
- Cholesterol crystals (CC), effect on thrombolysis with tissue plasminogen activator (tPA), 80
- Chromosomal Instability (CIN), role in tumor growth, 99
- Chronic kidney disease, role of activated omentum in preventing, 33
- Cigarette smoking  
impact on patients with sepsis, 129  
impact on WRN protein downregulation and cellular senescence via the p53 dependent pathway, 47
- C1 inhibitor (C1INH), role in hyaluronic Acid Binding Protein 2 (HABP2) mediated endothelial cell (EC) barrier disruption, 3
- Circadian rhythms, study of sleep duration and, in twins, 115
- Community hospital emergency department (ED), study of prevalence and characteristics of psychiatric illness in, 118
- Congenital uric acid nephrolithiasis, study, 97
- Cord factor trehalose 6,6'-dimycolated (TDM)-induced granuloma formation, therapeutic potential of lactoferrin modulation of, 27
- Coronary perforation, study of clinical and angiographic outcomes of, 127
- Co-stimulatory molecules, effect in orchestrating both T cell up-regulation and migration, 51

## D

- Depression, evaluation of Internet-based depression prevention intervention for adolescents ages 14–21 (CATCH-IT), 34
- Diesel exhaust particles (DEP), role in dysfunctional epithelial barrier and developing lung injury, 134

## E

- E2F1 expression, in hypertrophic cardiomyopathy, study, 93
- EGF-mediated oncogenic signaling, role of MOR, Src, Gab1, PI3 kinase, and STAT3 expression, 2
- Empty heart syndrome, role in the pathogenesis of neurocardiogenic syncope, 61
- End-of-life practices, role of religiosity and spirituality in, 103
- Endothelial NO synthase (eNOS or NOS3) deficiency, effect on hemodynamic outcomes and NO production following cardiac arrest and resuscitation in genetically-modified mice, 45
- Enoxaparin, therapeutic potential of, 9
- EphrinB2, role in regulating tumor microenvironmental constituents, 30
- Essential oils, role in attenuating influenza virus infection, 113
- Exercise, chronic, role in favorable alterations of vascular functions in athletes, 133

## F

- Factor V Leiden heterozygosity, association with IHH, 1
- Familial hypofibrinolysis, central retinal vein (CRVO) vs central retinal artery occlusion (CRAO) and with non-arteritic ischemic optic neuropathy (NAION), 12
- Familial thrombophilia-hypofibrinolysis, association with IHH, 1
- Fibroblast growth factor 23 (FGF23), study of, regulation in ADHR, 71
- Food and Drug Administration (FDA), effect on regulatory warning regarding atypical antipsychotics, 104
- FoxM1, role in stimulating human  $\beta$ -cell replication, 73
- F11 receptor/junctional adhesion molecule-A (F11R/JAM-A), role in atherosclerosis, 69
- FTY720, role in regulating pulmonary vascular permeability, 36

## G

- Germline single nucleotide polymorphisms (SNPs), role in predicting chemotherapy response and toxicity, 29
- Glucose regulation, effects of caloric restriction combined with partial sleep loss on, in overweight adults, 24
- Granulation tissue derived stem cells, role in preventing renal damage, 32
- Guanylyl cyclase C (GCC), role of the neuronal, in appetite and body weight regulation, 6

Gut sterilization, role in reducing leukocyte dependent (PMN) injury and angiogenesis, 57

## H

Halothane hepatitis, role of natural killer cells and interferon-gamma in, 63  
 Head shielding, stimulatory effect on pituitary corticotroph function post total body irradiation, 90  
 Hematopoietic cell transplantation (HCT), study of development of functional natural killer cells, 38  
 Heme oxygenase-1 (HO-1) enzyme, role of miRNA-377 and miRNA-217 in regulating, 55  
 Hepatocytes, role of regenerating liver stem cells (RLSC) in differentiating, in culture, 131  
 High Factor XI, role in recurrent pregnancy loss (RPL), 9  
 thrombophilic, 14  
 HIV, examination of strengths and weaknesses in the testing and treatment of, during pregnancy in Peru, 7  
 Home blood pressure monitoring, on a hypertensive medicare population, impact of interactive, 26  
 Hyaluronic Acid Binding Protein 2 (HABP2) mediated endothelial cell (EC) barrier disruption, role of C1 inhibitor (C1INH), 3  
 20-Hydroxyeicosatetraenoic acid (20-HETE), role in experimental renal IR injury, 87  
 Hyperinsulinemia-PCOS, association with IHH, study, 1  
 Hyperlipidemia, evaluation of epidemiology of vitamin D deficiency in asymptomatic patients referred for treatment of, 124  
 Hypertrophic cardiomyopathy, study of E2F1 expression in, 93

## I

Idiopathic intracranial hypertension (IHH), etiologies in childhood, 1  
 IFN $\gamma$  (MIG), role in chronic rejection (CR) in cardiac transplantation, 60  
 Inflammatory bowel disease (IBD), role of gut sterilization in preventing, 57  
 Integrin  $\beta$ 4, study of anti-inflammatory role in acute lung injury, 128  
 Intestinal oxalate transport, cholinergic signaling and regulation of, 78  
 Ischemic postconditioning (PC), impact on cardiac protection during the reperfusion (REP) period, 37

## K

Knee osteoarthritis (OA), effect of quadriceps strength and proprioception on, 122

## L

Laparoscopic bariatric surgery, study of postoperative pulmonary complications following, 117

Left ventricular outflow tract obstruction (LVOT), and right coronary artery (RCA), analysis of the combined clinical conditions of, 19  
 Leucine-rich repeat containing 20 (LRRC20) gene, role in IFN- $\alpha$  signaling in SLE, 54  
 Lipoprotein cholesterol, low and high density (LDL-C, HDL-C), effect of optimization in patients with and without cardiovascular disease (CVD) events, 17  
 Lovaza, efficacy and safety of usage in patients with triglycerides, 13  
 Lrp5/Sox9 pathway, gene and protein expression of, with atorvastatin in the joints and in the valves, 31  
 LY2189265, impact on glycemic control in Hispanic and non-Hispanic Caucasians with uncontrolled type 2 diabetes, 4  
 Lysophosphatidic acid (LPA), induced soluble (s) ST2 expression, role in epigenetic regulation, 59

## M

Methicillin Resistant *Staphylococcus aureus* (MRSA), study of, using molecular genotyping and geocoding technique, 119  
 Methylalntrexone (MNTX), role in attenuating EGF-mediated human bronchioloalveolar carcinoma (BAC), 2  
 Mindfulness-based relapse prevention, biological effects in alcohol dependence, 25  
 Mitochondrial permeability transition pore opening (MPTP), effect of mitochondrial manipulation during reperfusion (REP) on, 100  
 Multiple myeloma, role of c-FLIP in, 89  
 Mu opioid receptor (MOR), role in EGF-mediated oncogenic signaling, 2  
 Myalgia, symptomatic, in statin-treated patients differential diagnosis in women, 49  
 role of vitamin D supplementation in preventing, 43

## N

NCC function and protein expression, role of aldosterone, in stimulating, 41, 44  
 Neuralgia-inducing cavitation osteonecrosis of the jaws (NICO), role of T-786C mutation of the endothelial nitric oxide synthase (eNOS) gene, 102  
 Neurocardiogenic syncope, role of empty heart syndrome in the pathogenesis of, 61  
 1-N,4-N-bis[4-(1H-benzimidazol-2-yl)phenyl] benzene-1,4-dicarboxamide ((BIP)2B), study of specificity of, 5  
 Non-muscle myosin light chain kinase (nmMLCK), role as novel regulator of NADPH Oxidase-dependent ROS production by hyperoxia in caveolin-enriched microdomains (CEM) of HPAECs, 112  
 Notch signaling, role in T cell-mediated immune disorders, 135  
 Nox4, effect of, on cellular redox status and signaling in vascular smooth muscle cells (SMCs), 95  
 Nrf2-antioxidant response element, role in transcriptional regulation of hyperoxia-induced Nox4 expression in lung endothelium, 46

## O

Occludin, and ZO-1 dissociation in alveolar epithelial cells, role of diesel in, 134  
 Osteonecrosis of the jaw (ONJ), genetic risks of developing, in patients with metastatic cancer, 79  
 Overweight adults, effects of caloric restriction combined with partial sleep loss on glucose regulation in, 24  
 OX40, role in chemotaxis, 51  
 Oxidative phosphorylation (OXPHOS), study of relation with ischemic postconditioning (PC) in cardiac protection, 37  
 Oxidized phospholipids, role in regulation of lung endothelial permeability, 84

## P

Pancreato-liver abscess, with history of chronic calcified pancreatitis, study, 20  
 Papillary thyroid carcinoma (PTC) cell line, impact on MMPs and invasion across an ECM barrier, 65  
 Partner-assisted therapy (PAT), feasibility study of, 15  
 PIK3C3, study of association with serologic phenotype in lupus patients, 53  
 Plaque calcification, role of S100A12 vascular smooth muscle cells (VSMC) in atherosclerosis and, 92  
 Polymyalgia rheumatica, differential diagnosis of, 49  
 PPAR- $\gamma$  activation, role in preventing  $\beta$  cell function in type 2 diabetes, 42  
 Pre-B-cell colony-enhancing factor (PBEF), role in acute lung injury, 94  
 Pregnancy, examination of strengths and weaknesses in the testing and treatment of HIV and syphilis during, in Peru, 7  
 Prostate cancer, predictive factors of mortality in patients with, 108  
 Pulmonary fibrosis, study of epidemiology in veteran patients, 132

## Q

QT prolongation, study of correlation between serum concentrations of sotalol (S) and, 111

## R

Recurrent pregnancy loss (RPL) role of high Factor XI, 9  
 role of thrombophilic high factor XI, 14  
 Refractory idiopathic thrombocytopenic purpura (ITP), case report, 22  
 Regenerating liver stem cells (RLSC), role in differentiating hepatocytes in culture, 131  
 Religiosity, role in end-of-life practices, 103  
 Renal damage, role of granulation tissue derived stem cells in preventing, 32  
 Respiratory syncytial virus (RSV), role in limiting phosphorylation of eIF2 $\alpha$  and regulating cellular protein translation, 40  
 Rheumatoid arthritis (RA), effect of TNF-alpha blockade on cardiovascular outcomes and survival in patients with, 109  
 Right coronary artery (RCA), and left ventricular outflow tract obstruction (LVOT), analysis of the combined clinical conditions of, 19

**S**

- S100A12 vascular smooth muscle cells (VSMC), role in atherosclerosis and plaque calcification, 92
- Sepsis, impact of cigarette smoking in patients with, 129
- Sepsis-associated acute lung injury, role of sphingosine-1-phosphate (S1P) in, 67
- Sexually Transmitted Infections (STI), study of patients with elevated leukocytes on endocervical gram stain, 21
- Sleep duration, study of circadian rhythms and, in twins, 115
- Sotalol (S)
  - comparative study on the pharmacokinetic profile following oral and intravenous administration, 10
  - reliability of intravenous drug administration, 11
  - study of correlation between QT prolongation and serum concentrations of, 111
- Sphingosine-1-phosphate (S1P)
  - lysase, role in transcriptional regulation and post-translational modification in lipopolysaccharide (LPS)-induced acute lung injury (ALI), 88
  - role in lung inflammatory responses, 67
  - role in mitochondrial oxidative phosphorylation, 82
  - study of association with asthma, 66
- Spinal metastasis, predictive factors of mortality in patients with, 108
- Spirituality, role in end-of-life practices, 103
- Splinter hemorrhages, case report, 72
- Statins, a role in the treatment of joint disease and valvular heart disease, 31
- Stem cells, granulation tissue derived, role in preventing renal damage, 32
- Sudden cardiac death (SCD), evidence base for genetic testing and screening in, 23
- Syphilis, examination of strengths and weaknesses in the testing and treatment of, during pregnancy in Peru, 7

- Systemic Lupus Erythematosus (SLE)
  - ancestral differences in associations between disease manifestations and serum IFN- $\alpha$  in, 62
  - body image (BI) interventions for, 16
  - impact of genetic variation at IRF7/PHRF1 locus associated with autoantibody profile and serum interferon alpha activity in, 58
  - role of leucine-rich repeat containing 20 (LRRC20) gene in IFN- $\alpha$  signaling in, 54
  - study of association with PIK3C3, 53
  - type I IFN therapy for, study, 64
- Systolic blood pressure (BP) regulation, role of genomic variants in, 130

**T**

- T-786C mutation, of the endothelial nitric oxide synthase (eNOS) gene, role in neuralgia-inducing cavitation osteonecrosis of the jaws (NICO), 102
- TGF- $\beta$  activated kinase 1, and the role of PKC  $\xi$  and CaMKK in AMPK activation, 75
- Thrombelastography platelet mapping (TEG-PM), study of efficacy in the surgical population and with ambiguous results, 110
- Tissue plasminogen activator (tPA) therapy, efficacy in acute ischemic stroke, 98
- TNF- $\alpha$  blockade, effect on cardiovascular outcomes and survival in patients with rheumatoid arthritis (RA), 109
- TNF- $\alpha$  inhibitor, role in preventing salt-sensitive renal damages in renal ischemia/reperfusion (I/R) injury, 81
- Transforming growth factor beta-1 (TGF- $\beta$ 1), induced myofibroblast differentiation, role of cytoskeletal signaling, 91
- Transforming growth factor beta (TGF- $\beta$ ) receptors, study of modulatory mechanism of, 107
- Transient Receptor Potential Vanilloid 2 (TRPV) proteins, mechanism of action and potential uses of, 28

- Triglycerides (TG), effect of optimization in patients with and without cardiovascular disease (CVD) events, 17–18
- T wave alternans (TWA), role in predicting spontaneous VT or fibrillation (VF) in a canine model of coronary artery occlusion (CAO), 68
- Type 2 diabetes, impact of LY2189265 on glycemic control in Hispanic and non-Hispanic Caucasians with uncontrolled, 4
- Type I IFN therapy, for neuromyelitis optica (NMO) and lupus, study, 64

**V**

- Vascular smooth muscle cells (SMCs), effect of Nox4 on cellular redox status and signaling in, 95
- Ventilator-induced lung injury (VILI), impact of delayed cytoprotection on amifostine in preventing, 35
- Very low birth weight infants, comparative study of mortality and morbidity in multiple gestation, 114
- Vitamin D deficiency, evaluation of epidemiology of, in asymptomatic patients referred for treatment of hyperlipidemia, 124
- Vitamin D supplementation, role in preventing symptomatic myalgia in statin-treated patients, 43

**W**

- WRN protein downregulation, impact of cigarette smoking on, 47

**Z**

- ZO-1, and Occludin dissociation in alveolar epithelial cells, role of diesel in, 134
