Endothelial cell inflammatory responses, integrin beta4 mediates cyclic stretch-induced, 1319087
Endothelial colony forming cells in multiple myeloma, 1319087
Endothelial hyper permeability after thrombin, differential role of ezrin/radixin/moesin proteins in regulation of, 1315274
Enoxaparin in prevention of pregnancy loss and outcomes in women with polycystic ovary syndrome and familial thrombophilia, role of, 1382144, 1343851
Estrogen-dependent breast cancer cell proliferation in an EGFR-dependent manner, GH potentiates, 1344844
Ethanol-induced asmae activation in ethanol-fed mice, imipramine blocks, 1319068

Factor V Leiden mutation

Factor V Leiden mutation in osteonecrosis of the hip, role of, 1339799 with recurrent miscarriages, association of, 1339563
Familial hypertriglyceridemia despite maximal TG lowering therapy, assessment of efficacy and safety of Lovaza for the treatment of, 1314588
Familial thrombophilia role of glucophage and enoxaparin in prevention of pregnancy loss and outcomes in women with, 1322144, 1343851
thrombotic events after starting exogenous testosterone or arimidex in men with previously undiagnosed, 1287322
F-box protein FBXL19 in protection of lipopolysaccharide-induced lung inflammation and injury, role of, 1314929
Fibrosis in mice, role of lycosardiolipin acyltransferase in protection of bleomycin-induced, 1315053
FLT3 negative acute myeloid leukemia with combination mutations (NPM1+/CEBPα- and patients who have the combination mutations (NPM1+/CEBPα), comparison of, 1344887
FOXO transcription factors in adipose triglyceride lipase and GOS2 lipid droplet proteins regulation, role of, 1342693
Free fatty acid receptor 2 (FFAR2), in glucose homeostasis during pregnancy, 1336964

Geranylgeranylation of the cysteine-189 residue, RAC1 mitochondrial import and mitochondrial H2O2 generation is modulated by, 1344940
Glioblastoma, astrocyte-elevated gene-1 is induced by hypoxia and glucose deprivation and modulates the glycolytic phenotype in, 1344679
Glucocorticoid action in adipocytes, role of SMRT in regulation of, 1344722
Glucophage in prevention of pregnancy loss and outcomes in women with polycystic ovary syndrome and familial thrombophilia, role of, 1322144, 1343851
Glucose homeostasis during pregnancy, role of novel nutrient-sensingGPCR, FFAR2, in, 1336964
Glycogen synthase kinase 3, IL-33 induces its receptor ST2L degradation through activation of, 1314941
GOS2 lipid droplet proteins regulation, role of FOXO transcription factors and insulin in, 1342693
G-protein coupled receptors (GPCRs), in glucose homeostasis during pregnancy, 1336964
Graft versus host disease prevention, targeting histone deacetylases as a new strategy for, 1344835
Group v phospholipase A2 (GVPgA2) in increasing pulmonary endothelial permeability, role of, 1315024

Head-up tilt test (HUT) in postural orthostatic tachycardia syndrome distribution of blood pressure in response to quantitative, 1314495
relationship of patients with anxiety symptoms undergoing, 1311702
Health care, Chicago inequities in geographical access to, 1343195
Hepatic steatosis in ethanol-fed mice, imipramine blocks, 1319068
High-density liprotein in women, in positive association with serum 2-methoxyestradiol, 1319328
Insulin in adipose triglyceride lipase and GOS2 lipid droplet proteins regulation, role of, 1314894
Insulin receptor substrate-1 (IRS-1), endocrine disruptor tolylfluanid impairs adipocytic proliferation in an EGFR-dependent pathway of patient satisfaction scores of, 1310277
Ischemic preconditioning against myocardial infarction in mice, role of NOX1 NADPH oxidase in, 1314007
Isoniazid in causing rhabdomyolysis, role of, 1314575

Kruppel-like factor 2, simvastatin increases sphingosine-1-phosphate receptor 1 gene expression in human lung endothelium by, 1310277

Lipolysis in polycystic ovary syndrome, impaired in vivo suppression of, 1344470
Lipopolysaccharide-induced lung inflammation and injury, role of F-box protein FBXL19 in protection of, 1314929
Long QT syndrome (LQT1), variants in the 3' untranslated region of the KCNQ1-encoded KVT-1 potassium channel modify disease severity in patients with type 1, 1310574
Long-term memory formation, role of activity dependent mRNA processing of ORB2 in, 1334330
LPS-induced reactive oxygen species generation, tyrosine phosphorylation of paxillin regulates, 1314981
Lung cancer, role of MUC4 in, 1343707
Lung endothelial cells, cyclic stretch induces type 2 deiodinase expression in, 1314894
Lung endothelial microparticle release, pathologic stretch increases, 1314512
Lung transplantation, use of risedronate for prevention of bone loss after, 1344885
Lysocardiolipin acyltransferase (LYCAT), in protection of bleomycin-induced lung inflammation and fibrosis in mice, 1315053

Idiopathic hypercalcuria, exome sequencing in families with, 1314992
Implantable cardioverter-defibrillator (ICD), impact of pre-implant psychiatric diagnosis on mortality in patients with an, 1334225
Infarction-induced cardiac dysfunction, pulmonary hypertension in mice as a consequence of, 1315102
Insulin in adipose triglyceride lipase and GOS2 lipid droplet proteins regulation, role of, 1342693
Insulin receptor substrate-1 (IRS-1), endocrine disruptor tolylfluanid impairs adipocytic insulin signaling through a reduction in, 1319328
Insulin resistance, in peripheral nervous system of type 2 diabetes, 1342700
Integrin beta4, in mediation of cyclic stretch-induced endothelial cell inflammatory responses, 1310857
Interleukin 6 gene are associated with susceptibility to severe sepsis and acute lung injury, polymorphisms of, 1344945
International medical graduates, evaluation of patient satisfaction scores of, 1244673

Maturity-onset diabetes of the young (MODY), cost-effectiveness of genetic testing for, 1344135
Medical device approval system, premarket approval (PMA) application, 1309817
2-Methoxystarchol, positively associated with serum high-density lipoprotein in women, 1235618
MicroRNA-130A, conduction abnormalities in adult cardiomyocytes overexpressing, 1344274
MicroRNAs processing genes and implications for Human complex traits, microRNA processing genes and implications for, 1347604
system of type 2 diabetes, 1342700
system, development of natural killer cells access to, 1343195
association with serum 2-methoxyestradiol, 1319328
insulin signaling through a reduction in, 1322144, 1343851
lipid droplet proteins regulation, role of, 1344941
activation of, 1314941
paxillin regulates, 1314981
lung injury, polymorphisms of, 1344945
lung transplantation, use of risedronate for prevention of bone loss after, 1344885
Lysocardiolipin acyltransferase (LYCAT), in protection of bleomycin-induced lung inflammation and fibrosis in mice, 1315053

F-box protein FBXL19 in protection of lipopolysaccharide-induced lung inflammation and injury, role of, 1314929
Fibrosis in mice, role of lycosardiolipin acyltransferase in protection of bleomycin-induced, 1315053
FLT3 negative acute myeloid leukemia with combination mutations (NPM1+/CEBPα-) and patients who have the combination mutations (NPM1+/CEBPα), comparison of, 1344887
FOXO transcription factors in adipose triglyceride lipase and GOS2 lipid droplet proteins regulation, role of, 1342693
Free fatty acid receptor 2 (FFAR2), in glucose homeostasis during pregnancy, 1336964

Geranylgeranylation of the cysteine-189 residue, RAC1 mitochondrial import and mitochondrial H2O2 generation is modulated by, 1344940
Glioblastoma, astrocyte-elevated gene-1 is induced by hypoxia and glucose deprivation and modulates the glycolytic phenotype in, 1344679
Glucocorticoid action in adipocytes, role of SMRT in regulation of, 1344722
Glucophage in prevention of pregnancy loss and outcomes in women with polycystic
role of glucophage and enoxaparin in prevention of pregnancy loss and outcomes in women with, 1322144, 1343851
thrombotic events after starting exogenous testosterone or arimidex in men with previously undiagnosed, 1287322
in patients without carotid artery atherosclerosis, pathoetiologic reversible association of amaurosis fugax with, 1309173
reversible association of central retinal artery and vein thrombosis with, 1315562
Thyroid test abnormalities in MCT8 defect, dynamic evolution of, 1294469
Tolylfluanid impairs adipocytic insulin signaling, in reduction of insulin receptor substrate-1 level, 1319328
Tumor necrosis factor alpha inhibition in rheumatoid arthritis, baseline serum interferon alpha/beta ratio predicts response to, 1344900
Tumorigenesis, selective contribution of chromosomal instability to, 1314605
Type 2 diabetes cost-effectiveness of genetic testing for, 1344135
experimental sleep restriction reduces physical activity in adults with parental history of, 1314670
increases in nitric oxide bioavailability fail to improve vascular compliance in elderly patients with, 1311096
insulin resistance in the peripheral nervous system of, 1342700
patient characteristics and participation in genetics sub-study of insulin-treated patients with, 1310312

US medical graduates (USMGs) and international medical graduates, difference between the patient satisfaction scores of, 1244673
Vancomycin heteroresistance in Staphylococcus aureus in a tertiary care teaching hospital, prevalence of, 1336743
Vascular compliance in elderly patients with type 2 diabetes, increases in nitric oxide bioavailability fail to improve, 1311096
Ventricular arrhythmia in mitochondrial oxidative stress, Cx43 remodeling and decreased cardiac sodium are substrates for, 1344918
