

## Midwestern Regional Program Abstracts Subject Index

**A**

- $\alpha 2\beta 1$  integrin, dynamic interplay of tumor and microenvironmental contributions of, in squamous cell carcinoma, 14
- Activated omentum to kidney, fusion of, in attenuation of progression of chronic kidney disease in a rat remnant kidney model, 65
- Activator of G protein signaling 3 (AGS3), loss of, in rodents, impairs renal tubular regeneration following acute kidney injury, 10
- Acute aldosterone treatment, enhancement of SPAK and NCC phosphorylation by, 67
- Acute coronary syndromes, chronic kidney disease as a risk factor for, in patients presenting to the emergency room with chest pain, 97
- Acute lung injury (ALI)  
candidate genes associated with the protective effects of SEW-2871 on brain death-induced, 13  
involvement of sphingosine-1-phosphate receptor 3 gene promoter variants in sepsis-associated, 3
- Advanced glycation endproducts (AGEs) in diabetic sensory neuropathy, 80
- Advanced subclinical atherosclerosis and metabolic syndrome, relationship between, as assessed by coronary calcium, 4
- Agonist-induced endosomes, fusion of, with intracellular vesicles, to create Nox1 redox-endosomes, 21
- Aldo-keto reductase family 1 B10 (AKR1B10) protein, expression of, in pancreatic adenocarcinoma, 115
- Alveolar epithelial cells target, for *Bacillus anthracis* lethal toxin, 54
- Angiotensin II mediated connexin 43, remodeling of, and prevention of sudden cardiac death by mitochondria-targeted antioxidant Mito-TEMPO, 6
- APOL1 expression patterns, arteriolar wall, and dynamic podocyte in non-diabetic kidney disease, 114
- Atherosclerosis, thrombophilia, hypofibrinolysis and progressive coronary artery disease, interaction between, 74
- Autophagy and caloric restriction, activation of, suppress tau toxicity in a *Drosophila* model of tauopathy, 35
- Autophagy and HIV protease inhibitor-induced ER stress, link between, in adipocytes and hepatocytes, 55

**B**

- Body mass index (BMI), heritability of, influence of sleep duration on, 77

**C**

- Calcium homeostasis and islet beta cell SERCA2 expression, regulation of, in type 2 diabetes mellitus, 7
- Calcium oxalate kidney stone disease, relevance to, 95

- Caloric restriction and autophagy, activation of, suppress tau toxicity in a *Drosophila* model of tauopathy, 35
- Canakinumab (ACZ885), efficacy of, in preventing flares in gout patients initiating allopurinol therapy, 63
- Carbohydrate response element binding protein (ChREBP), activation of, by ethanol, 82
- Cardiac output and device flows, correlation of, in the Heart Mate II LVAD, 102
- Cardiac repolarization, gender differences in, following intravenous sotalol administration, 84
- Cardiac troponin, elevation of, in critically ill patients with no coronary disease, 39
- Cardiovascular disease, type 2 diabetes mellitus, and high blood pressure at age 40 and risk factors at age 12, associations of, 23  
children's risk factors at age 12 to identify parents with, by, 66
- CD30/CD30L signaling, role of, in Treg mediated suppression of T cell function, 11
- CD4+ T-cell responses to the human papillomavirus type-16 E6 protein, association between, 15
- Chronic kidney disease, risk of, in patients presenting to the emergency room with chest pain, 97
- Citrobacter rodentium* induced gut inflammation and water avoidance induced stress, lymphangiogenesis in, 73
- Claudin-5, upregulation of, by simvastatin, 5
- Communication disabilities, mortality among patients with, during post-hospitalization, 41
- Coronary calcium, assessment of metabolic syndrome and advanced subclinical atherosclerosis by, 4
- Cortactin, role of, in allergic airway responses in a murine model of asthma, 52
- COX-2/PGE2/EP receptor pathway, piracy of, by Kaposi's sarcoma associated herpesvirus (KSHV), 12
- Cutaneous Lupus Disease Area and Severity Index (CLASI), validation of, for lupus, 105
- Cytochrome C-Rac1 interaction, in asbestos-exposed macrophages, induces mitochondrial  $H_2O_2$  production, 8
- Cytochrome P450 (CYP) isoforms, effect of ethanol on expression of, in podocytes, 112

**D**

- DEK oncogene, expression of, in head and neck squamous cell carcinoma, 45
- Device flows and cardiac output, correlation of, in the Heart Mate II LVAD, 102
- Diabetic sensory neuropathy, advanced glycation endproducts in, 80
- Diodinase2 (Dio2), protective role of, in acute inflammatory lung injury, 49
- Divalproex and risperidone, clinical predictors of treatment response to, among youth with pediatric bipolar disorder, 32

- Dust exposure, impact of, on respiratory health and disease resistance, 117

**E**

- EphA2 receptor, transactivation of, for hyaluronan/CD44-mediated human pulmonary angiogenesis, 34
- EphrinB2, regulation of tumor immune microenvironments by, 18
- Estradiol, high levels of, in hypogonadism, using testosterone treatment, 72
- Exogenous testosterone or arimidex, impact of, resulted in hips-jaw osteonecrosis, pulmonary embolism, and amaurosis fugax in men with previously undiagnosed familial thrombophilia, 121
- Ezrin/radixin/moesin proteins, differential regulation of S1P-induced pulmonary endothelial cell barrier enhancement by, 50

**F**

- Free light chains, comparison of utility of serum, in systemic lupus erythematosus disease activity, with interferon  $\alpha$  and interleukins, 118
- FTY720 S-phosphonate, comparison of superior barrier promoting properties of, with S1P and FTY720 in vitro and in vivo, 90

**G**

- GADD45a, role of, in regulation of Akt signaling in mechanical stress-induced lung injury, 100
- Ghrelin, role of, in regulation of insulin secretion and beta-cell function, in healthy humans, 2
- G4 polyamidoamine (PAMAM) dendrimer, development of, as an ideal nanoscale delivery system for islet transplant, 33
- Graft *versus* host disease, diagnosis of, using REG3 $\alpha$  biomarker, 1
- Granulation tissue derived stem cells (GTSC), repair of acute kidney injury using, 64

**H**

- Hdac1 and Hdac2, control of p63 and p53 functions by, in epidermal progenitor cells, 56
- HDAC6, regulation of stress-induced changes in PFC synaptic function by, 107
- Hepatocyte growth factor (HGF)-mediated lung endothelial barrier regulation, 101
- High blood pressure, cardiovascular disease, and type 2 diabetes mellitus at age 40, and risk factors at age 12, associations of, 23  
children's risk factors at age 12 to identify parents with, by, 66
- Histone deacetylase 11, role of, in regulating T-cell reactivity, 106
- HIV protease inhibitor-induced ER stress and autophagy, link between, in adipocytes and hepatocytes, 55

Hospital-acquired conditions and pay-for-performance, 20  
 hsa-miR-374a and hsa-miR-568, participation of, in attenuating LPS-and cyclic stretch-induced PBEF gene expression in human lung endothelium, 92  
 Human umbilical cord blood-derived mesenchymal stem cells, effectiveness of, for repair of intervertebral disc, 79  
 Hyaluronidase-1, role of, in human pulmonary endothelial barrier regulation, 70

**I**

IFIH1 rs1990760 SNP, association of, with interferon alpha response and dsDNA autoantibodies in lupus patients, 40  
 Immunotherapy agents, microbiological evaluation of, in clinical practice, 69  
 Intracellular vesicles, fusion of, with agonist-induced endosomes, to create Nox1 redox-endosomes, 21  
 IRF8 allele, association of, with susceptibility to multiple sclerosis and systemic lupus erythematosus, 44  
 Iron-containing particles induce growth of *P. aeruginosa*, 111  
 Ischemic heart disease, high prevalence of, in patients with hyperuricemia and chronic gout, 93  
 Islet beta cell SERCA2 expression and calcium homeostasis, regulation of, in type 2 diabetes mellitus, 7

**K**

Kaposi's sarcoma associated herpesvirus (KSHV), piracy of COX-2/PGE2/EP receptor pathway by, 12

**L**

Left ventricular diastolic dysfunction and supernormal ejection fraction, 68  
 Leptin signaling and oxalate homeostasis, 95  
 Loneliness, meta-analysis of interventions to reduce, 66  
 Lymphangiogenesis, evaluation of, in water avoidance induced stress and *Citrobacter rodentium* induced gut inflammation, 73  
 Lysocardiolipin acyltransferase (Lycat) gene, role of, in radiation-induced pulmonary fibrosis, 57

**M**

Marinobufagenin and angiogenic imbalance, role of, in preeclampsia, 122  
 Mast cell mediators, role of, in enhancement of sensory mechanisms in the urinary bladder after TNBS colitis, 113  
 Medical informatics and ignoramics, 120  
 Medicare-specialized nurse case management, impact of, 62  
 Metabolic syndrome and advanced subclinical atherosclerosis, relationship between, as assessed by coronary calcium, 4  
 MicroRNAs, coordination of pro-inflammatory M1, to suppress alternatively activated M2 phenotypic functionality of phagocytosis in mouse primary microglia, 89

Microtubule perturbation, exquisite sensitivity of dividing cancer cells to, 81  
 Mitochondrial SOD, role of, in hyperoxia-induced dysfunction of lung endothelium, 108  
 Mitochondria-targeted antioxidant Mito-TEMPO, prevention of sudden cardiac death and angiotensin II mediated connexin 43 remodeling by, 6  
 Myocardial late gadolinium enhancement, significance of, in sickle cell disease, 16

**N**

NOD2 expression, upregulation of, by organic dust via NF- $\kappa$ B negatively regulating organic dust-induced inflammatory responses, 22

**O**

Oligomenorrhea, adolescent, in a healthy, bi-racial schoolgirl cohort  
 prediction of impaired fasting glucose plus type 2 diabetes, insulin, glucose, and HOMA insulin resistance and centripetal obesity among, 31  
 prediction of insulin, glucose, and HOMA insulin resistance among, 27  
 Omega-3 polyunsaturated fatty acids, short term effects of, on heart rate variability in a control population, 125  
 Oxalate homeostasis and leptin signaling, 95  
 Oxidative-mechanical Lrp5 aortic valve osteoblastogenesis, regulation of, using tissue stem cell niche, 46

**P**

Pay-for-performance and hospital-acquired conditions, 20  
 Pediatric bipolar disorder (PBD), divalproex and risperidone treatment response to, 32  
 Pegloticase, QT interval prolongation effect of, 94  
 Percutaneous coronary intervention (PCI) outcomes, race-based disparities in post, independent of socioeconomic status, 24  
 PFC synaptic function, regulation of stress-induced changes in, by HDAC6, 107  
 Phosphatidylinositol 4-kinase, essential role of, in hepatitis C virus replication complex assembly, 104  
 Phospholipids transfer protein (PLTP), liver-specific expression of, in atherogenic lipoproteins production, 96  
 Prematurity, mouse model of, in reduced nephron number and hypertension, 99  
 Primary language, association of, with medical management of diabetes, hypertension, and hyperlipidemia, in hispanic chronic kidney disease population, 76  
 Probenecid, role of, in myocardial contractility without worsening ischemic damage, in an infarct model, 58  
*Pseudomonas aeruginosa*, effect of, on expression of Nox proteins in vivo and in vitro, 109  
 Pulmonary hypertension, genomic evaluation of, in sickle cell disease, 91

**R**

Rac1-cytochrome C interaction, in asbestos-exposed macrophages, induces mitochondrial H<sub>2</sub>O<sub>2</sub> production, 8  
 Radiation-induced lung injury, role of sphingolipid pathway components in, 123  
 RAG-1 mutant Dahl salt sensitive rats, and NaCl-induced hypertension, relationship between, 98  
 REG3 $\alpha$  diagnostic biomarker, identification and validation of, for gastrointestinal tract graft *versus* host disease, 1  
 Right ventricular contractility, prediction of functional response to resynchronization by, 38  
 Risperidone and divalproex, clinical predictors of treatment response to, among youth with pediatric bipolar disorder, 32

**S**

S100A12 (EN-RAGE), association of, with arterial calcification and vascular remodeling in chronic kidney disease, 19  
 Serum cytokines in sarcoidosis, 78  
 SEW-2871, candidate genes associated with the protective effects of, on brain death-induced acute lung injury, 13  
 Sex hormone binding globulin, oligomenorrhea, and childhood insulin at age 14, association of, with metabolic syndrome and class III obesity at age 24, 51  
 Sickle cell disease, myocardial late gadolinium enhancement in, 16  
 Simvastatin, endothelial cell barrier regulation by, 5  
 Sleep duration, influences of, on heritability of body mass index, 77  
 Social support and mortality, association of, in African Americans with chronic kidney disease, 116  
 Sotalol induced QTc prolongation, gender differences in assessment of, 84  
 SPAK and NCC phosphorylation, enhancement of, during acute aldosterone treatment, 67  
 Sphingolipid pathway components, critical role of, in murine radiation-induced lung injury, 123  
 Sphingosine kinase 1 and S1P lyase, differential roles of, in hyperoxia induced ROS generation and lung injury, 26  
 Sphingosine kinase 1 deficiency, involvement of, in bleomycin induced mouse lung fibrosis, 110  
 Sphingosine-1 phosphate (S1P) induced pulmonary endothelial cell barrier enhancement, regulation of, by ezrin/radixin/moesin proteins, 50  
 lyase and sphingosine kinase 1, differential roles of, in hyperoxia induced ROS generation and lung injury, 26  
 lyase expression, regulation of lipopolysaccharide-induced, in lung endothelium, 124  
 Sphingosine 1-phosphate receptor 3

gene, functional promoter variants of, in decreasing human susceptibility to severe sepsis-associated acute lung injury, 3

nitrated, as biomarker for acute lung injury, 28

Spindle assembly checkpoint (SAC), Aurora B kinase activity and CENP-H and CENP-I in, 48

Statins and vitamin D deficiency, reversible interaction between, in myositis-myalgia, 25, 29, 75

Stool testing, repeat, using toxin (A and B) enzyme immuno assay, for diagnosis of *Clostridium difficile* infection, 53

*Streptococcus anginosus* group (SAG), epidemiology of infections caused by, at Tertiary Care Hospital in Springfield, Illinois, 83

Sudden cardiac death, prevention of, and angiotensin II mediated connexin 43 remodeling by mitochondria-targeted antioxidant Mito-TEMPO, 6

Supernormal ejection fraction and left ventricular diastolic dysfunction, 68

Systemic lupus erythematosus (SLE) association of IRF8 allele with susceptibility to multiple sclerosis and, 44

familial aggregation of high tumor necrosis factor alpha levels in, 43

gene-expression guided selection of candidate loci and molecular phenotype analyses enhance genetic discovery in, 87

UBE2L3 risk allele for association with, in African-American SLE cohort, 85

---

**T**

---

Tamoxifen, identification of genetic variants to cellular sensitivity of, using a genome-wide cell-based model, 71

TAZ, role of, as a regulator of mesenchymal transformation and clinical aggressiveness in glioma, 9

T cell co-stimulatory molecule OX40, role of, in intravascular leukocyte trafficking and adhesion, 47

Telangiectasias and pulmonary gas exchange, relationship between, in patients with scleroderma, 119

Testosterone treatment, efficacy of, for hypogonadism leading to high estradiol levels, 72

TGF beta receptors, nuclear localization of, in mesenchymal derived cells from the lung, 126

Thromboelastogram-platelet mapping (TEG-PM), determination of platelet inhibition using, in patients receiving dual antiplatelet therapy, 88

TLR-4 stimulating factor, presence of, in synovial fluid from patients with meniscal injury with or without osteoarthritis, 30

Transhiatal and transthoracic esophagectomy, outcomes after, for esophageal cancer, 103

TULA-2 mediated Syk dephosphorylation, determination of, in regulation of osteoclast differentiation and function, 36

Tumor necrosis factor alpha (TNF- $\alpha$ ) levels, familial aggregation of, in systemic lupus erythematosus, 43

Type 2 diabetes mellitus, cardiovascular disease, and high blood pressure at age 40, and risk factors at age 12, associations of, 23

children's risk factors at age 12 to identify parents with, by, 66

---

**U**

---

UBE2L3, evaluation of the autoimmune disease risk allele of, in African-American lupus patients, 85

---

**V**

---

Vasodilator-stimulated phosphoprotein (VASP), role of, in PAR-1 induced endothelial permeability in mouse lungs, 60

Velocity vector imaging echocardiography, validation of, with magnetic resonance imaging, in mouse models of cardiomyopathy, 86

Vitamin D deficiency and statins, reversible interaction between, in myositis-myalgia, 25, 29, 75

---

**W**

---

Water avoidance induced stress and *Citrobacter rodentium* induced gut inflammation, lymphangiogenesis in, 73
